

CTE Classes Provide...

Pathways and Preparation for High Demand Fields

Engaging, Real World Projects and Challenges

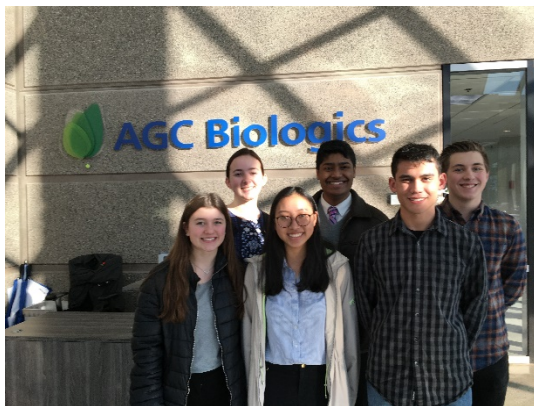

College Credit and Industry Certification

Career Exploration and Work-Based Learning Experiences

Equivalency Credit in other Academic Areas

Opportunities for Leadership, Service and Skill Competitions

Edmonds CTE and AGC Biologics Develop Student Internship Program

After several months of planning and preparation, Edmonds CTE and [AGC Biologics](#) in Canyon Park have launched a new paid student internship program for students enrolled in our Biotechnology programs. This exciting program is in partnership with [Career Connect Washington](#), a new state initiative focused on helping launch students into entry level careers in many high demand fields in our region.

The following Edmonds CTE students were selected for the initial pilot of this program:

- Douglas McAnally, Lynnwood High School
- Catherine Do, Meadowdale High School
- Erica Lampers, Mountlake Terrace High School
- Jaden Lofrese, Mountlake Terrace High School
- Kaylee Hynek, Mountlake Terrace High School
- Glaxton Joseph, Mountlake Terrace High School

These students began their internships on February 7th and will intern at AGC Biologics through the middle of June in the areas of Quality Assurance, Process Development, and Manufacturing. In addition to gaining valuable work experience in the Bio-Pharmaceutical Manufacturing industry, students will also earn high school CTE credit.
